

FOR IMMEDIATE RELEASE

NETWORK DYNAMICS, INC. RECEIVES MULTIPLE SPECIALIZATION RENEWALS FROM CISCO SYSTEMS

Oldsmar, Florida – February 8, 2006 – Network Dynamics, Inc., a network technology and life cycle solutions provider, announced today it has been officially renewed by Cisco Systems as a VPN Security, Wireless LAN and Routing & Switching Specialization Partner in the U.S. These specializations are part of the ongoing certification process required by Cisco that allows NDI to maintain their status as a Cisco Systems Gold Certified Partner. It means that Network Dynamics continues to meet the resource requirements for all of these specializations and is qualified to sell, install and support customers across all of these Cisco networking product categories.

“Our technical support team is committed to maintaining the high level of operational expertise that Cisco demands of its Gold Certified Partners,” said Jim Griffin, NDI’s senior vice president of service delivery. “Customer satisfaction is a major part of Cisco’s certification process and NDI’s top priority is to provide our customers with knowledgeable technicians and excellent customer support – this makes it a win-win for everyone.”

Cisco Technology Specializations provide partners like NDI with training in presales, deployment and post-sales support for specific technologies or solutions. By choosing a Cisco Technology Specialized Partner, customers know that the partner has the core knowledge and skills required to deploy the technology. The Cisco VPN Security Specialization allows NDI to sell, design, install and support a comprehensive network security solution. The Cisco Wireless LAN Specialization recognizes NDI for our knowledge and expertise in building and maintaining end-to-end wireless network connections throughout or between buildings, without the limitations of wires or cables. The Cisco Routing & Switching Specialization requires NDI to demonstrate knowledge of building, configuring and troubleshooting campus and remote access networks using Cisco Catalyst multilayer switching technologies over high-speed Ethernet and Cisco routers connected in LANs and WANs.

Cisco places great value on the commitment and expertise that Network Dynamics has demonstrated with their technology specializations and looks forward to a continued successful partnership with NDI.

About Network Dynamics, Inc. (NDI)

Network Dynamics, Inc. is a network technology and life cycle solutions provider that offers its customers a comprehensive suite of product and service solutions including network implementation, custom network support, managed services and consulting services. NDI is a Cisco Systems Gold Certified Partner. With a state-of-the-art customer support center, a field staff of over 1,000 technicians and a network of over 100 depot and logistics centers nationwide, NDI helps customers develop the best network solution possible for their business – solutions for a world of change.
