NETWORK DYNAMICS ACHIEVES GOLD RE-CERTIFICATION FROM CISCO SYSTEMS

OLDSMAR, Fla. -- December 18, 2007 -- Network Dynamics, Inc. (NDI) announced today it has achieved Gold re-certification from Cisco Systems®. The Cisco® Channel Partner program provides NDI with the resource framework to develop an expertise to sell, plan, design, implement and operate Cisco networking solutions. To earn Gold certification, NDI had to meet or surpass the stringent personnel, training, customer satisfaction, specialization, and post-sales support requirements set forth by Cisco. The re-certification affirms NDI's outstanding performance as a proven provider of Cisco Solutions.

"We are committed to creating the tools, training and programs that help drive channel partner profitability through improved productivity and return-on-invested capital," said Keith Goodwin, vice president, Worldwide Channels for Cisco. "With specializations in Advanced Security, Advanced Wireless LAN, Advanced Routing & Switching, and Advanced Unified Communications, NDI has secured the training, skills and knowledge to play a pivotal role in accelerating the adoption of Cisco technology solutions."

The program delivers state-of-the-art technical and sales training so that certified partners can increase their ability to deliver services related to the latest Cisco technologies for maximized productivity. Cisco Gold Certified partners are recognized and rewarded for employing some of the industry's best-trained network technicians who can demonstrate their expertise in planning, designing, implementing and supporting Cisco network solutions. These teams of network technicians are audited annually to ensure that they consistently deliver industry-leading support and maintain the rigorous Cisco standards for network expertise and support capabilities.

"We value our relationship with Cisco and are pleased to be re-certified as a Cisco Gold Partner," said Jim Griffin, senior vice president of service operations for NDI. "Our customers depend on us to help them plan, implement and operate their critical communications environments. Our distinction as a Gold Certified Partner validates their selection of NDI and reflects our on-going commitment to the delivery of best-of-breed solutions and exceptional support for our customers."

As a Cisco Gold Certified Partner, NDI enjoys several benefits, most notably, access to the latest Cisco customer satisfaction tool, Partner Access onLine (PAL). The new PAL tool is based on the same technology that Cisco uses to monitor and improve its own customer satisfaction. Other benefits include increased access to the Cisco technical support teams as well as access to password-protected Websites with real-time product and training information.

Cisco Gold Certified partners provide 24x7 technical services with one-hour response time for problem resolution and four-hour on-site response capabilities. These rigorous support requirements highlight NDI's commitment to supporting its strategic business network and sustainable business models.
